

ALI BABA PASS

Open Sesame to a Premium Experience

Outline

Introduction

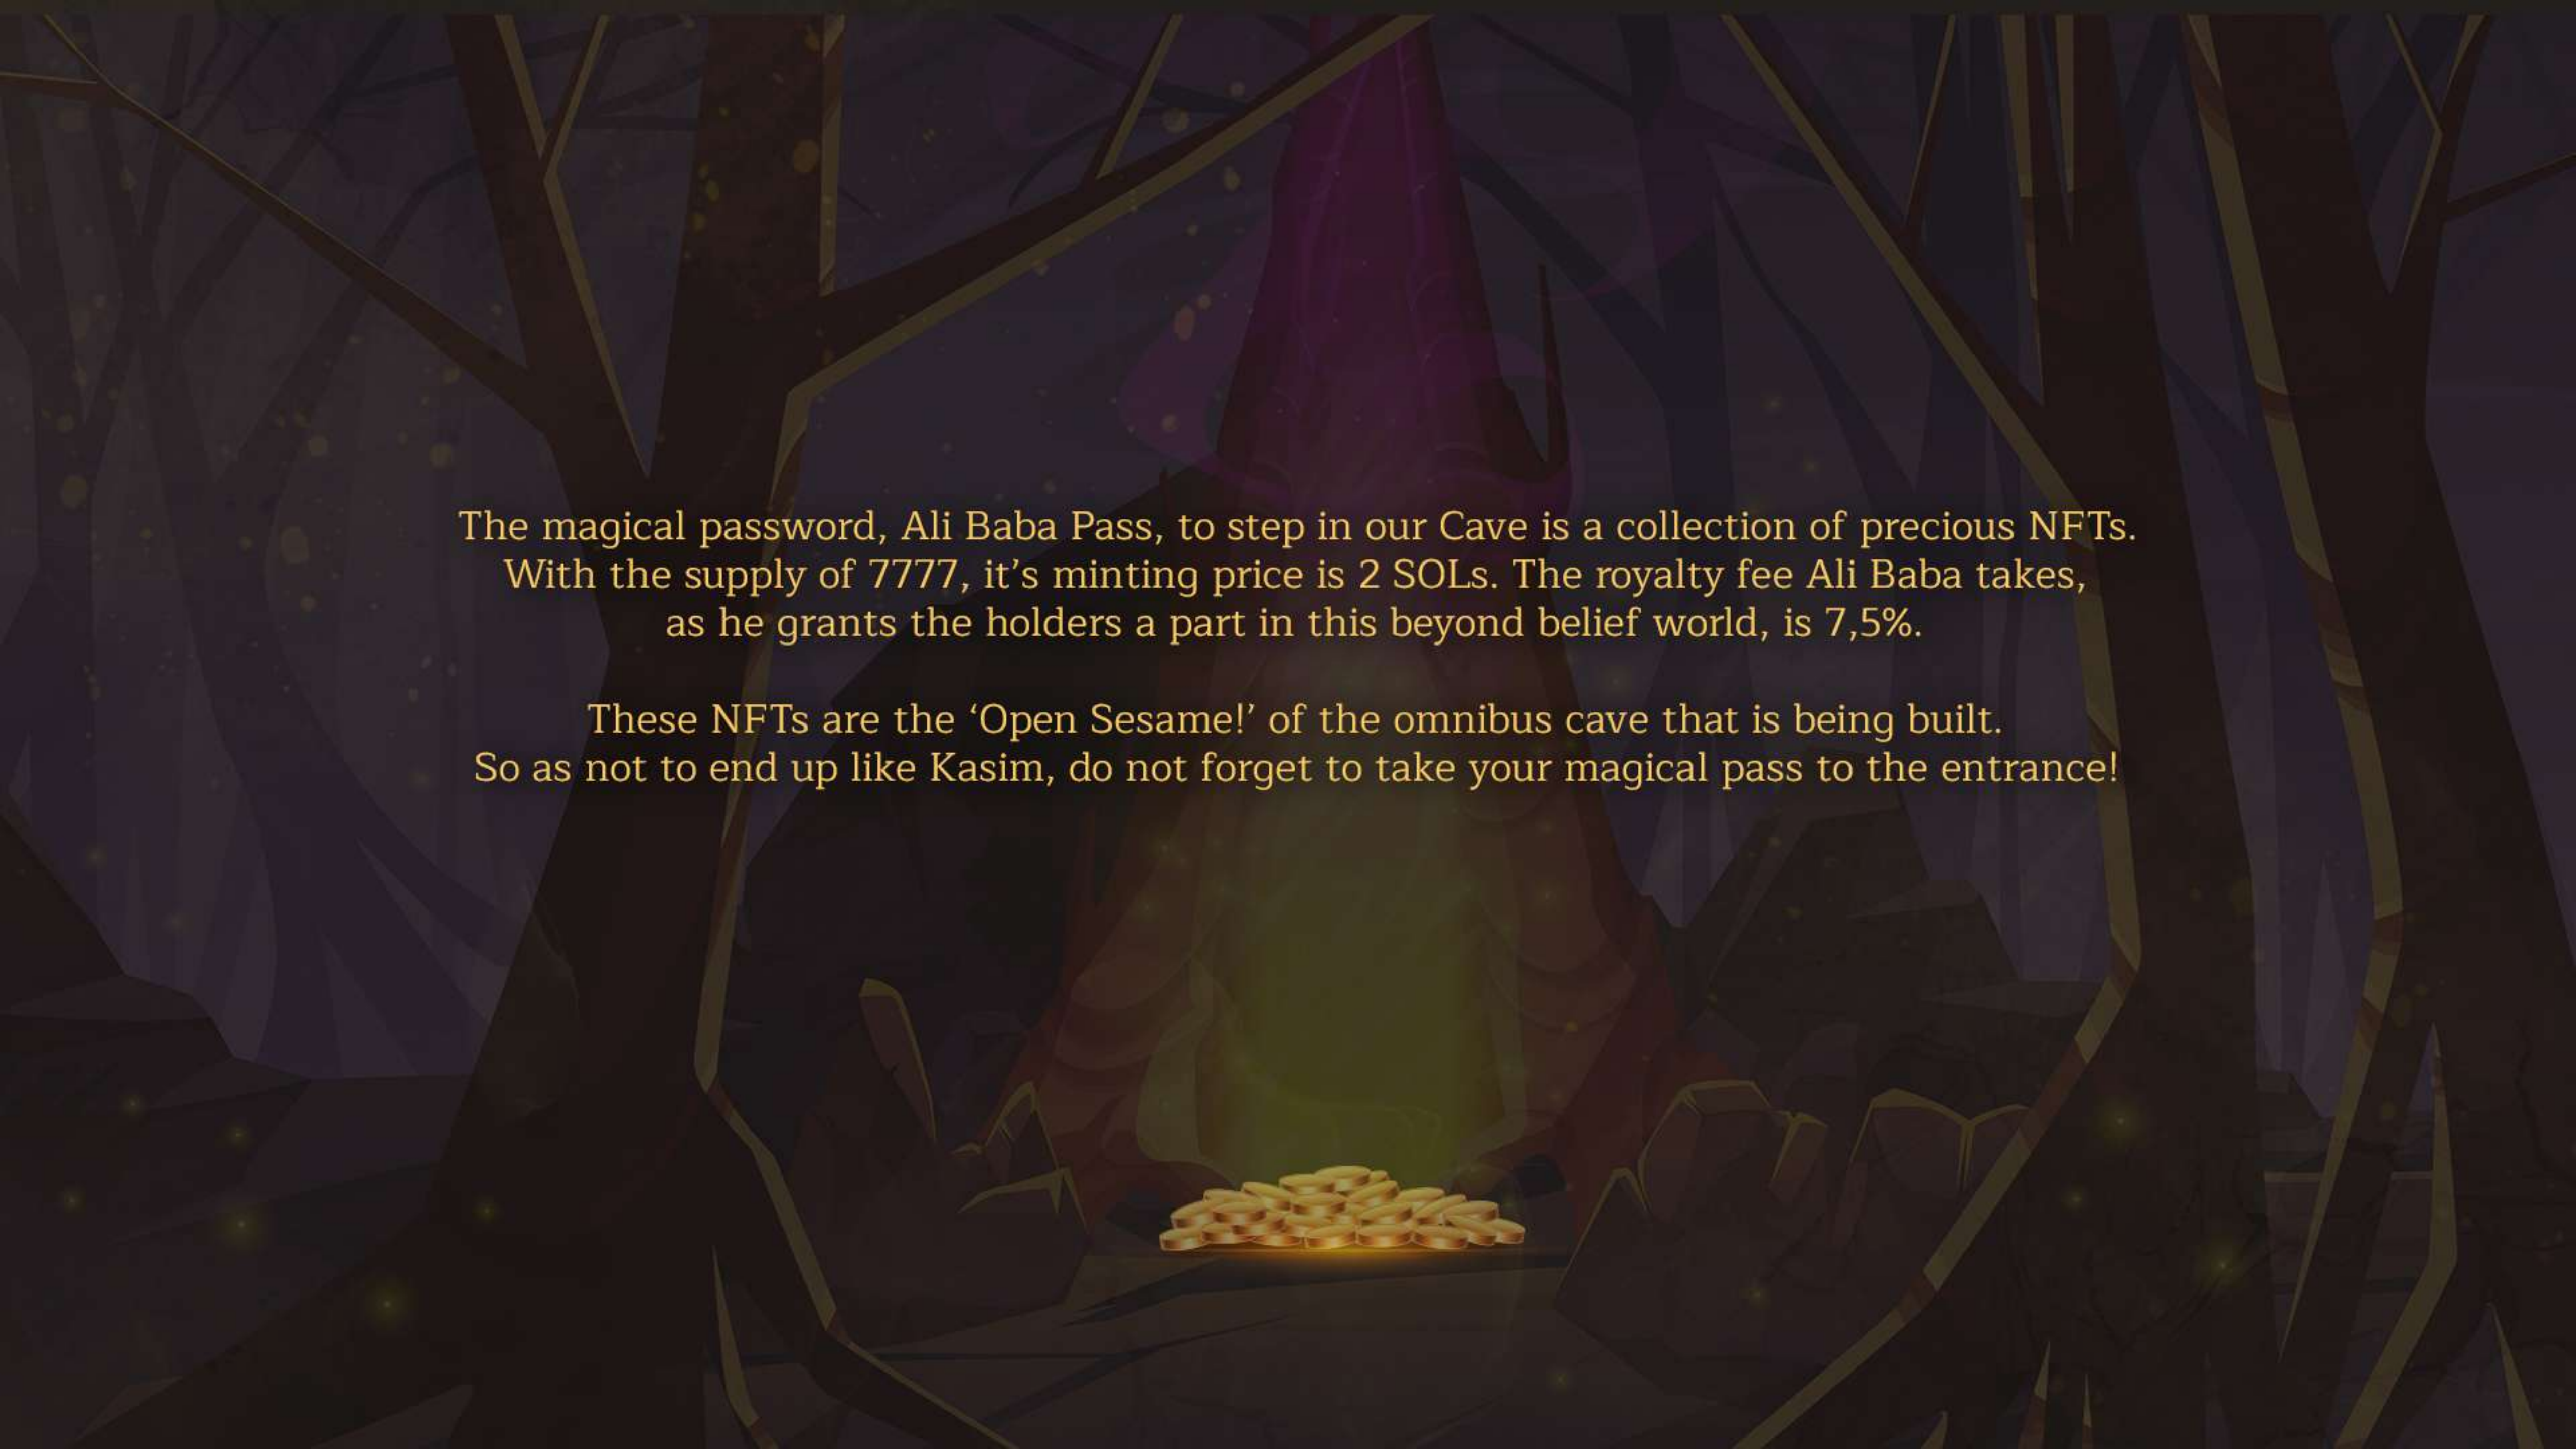

Overview

OPEN SESAME!

These two magic words are engraved to minds of everyone, even if they have never heard the story of Ali Baba and the Forty Thieves. These are such words that they evoke the concept of capturing lightning in a bottle. Everyone fantasizes of a cave, full of treasure that no one can have access but them; and to open it, a magical pass that others around them envy.

What if we told you with Ali Baba Pass, this fantasy is coming to life?
We present you Ali Baba Pass, a card that everyone wants to possess.
A card that can grant access to unreachable opportunities of our treasured 'cave'.

The magical password, Ali Baba Pass, to step in our Cave is a collection of precious NFTs. With the supply of 7777, it's minting price is 2 SOLs. The royalty fee Ali Baba takes, as he grants the holders a part in this beyond belief world, is 7,5%.

These NFTs are the 'Open Sesame!' of the omnibus cave that is being built. So as not to end up like Kasim, do not forget to take your magical pass to the entrance!

There are various doors Ali Baba Pass opens for you,
let's knock on them to see the magic happen.

Whitelist Privilege

First entrance we encounter benefits Ali Baba Pass holders the whitelist privilege. In other words, their wallets will be marked with a white chalk just like Ali Baba's door. However, this mark avails whitelisting Ali Baba Pass holders' wallets for upcoming projects to give access before anyone else.

Thus, if you know and use the magic words, you will not have to complete additional steps to join this universe.

Giveaways

This door actually presents more than one entrance
which lead to multiple opportunities.

Let's use Open Sesame to explore the opportunities
beyond these entrances!

Giveaways

The entrance lead us to the first alternative of the giveaways.

Let's investigate the details:

If an upcoming project which decides to be located in the cave, aims to constitute a community, they are free to establish a giveaway of their treasure.

The treasure being their NFTs, this giveaway will be only exclusive to those who possess the magic pass.

Herewith, these projects can commence building their base community with peerless Ali Baba Pass holders.

Giveaways

As we pass through the first entrance,
the next entrance welcomes us.

Say the words, Open Sesame and it deigns us
this information below:

As mentioned before, Ali Baba takes
a royalty fee of 7,5%. The plan is to
use the 10% of the collected royalty
fees for purchasing a fair amount of
NFTs of upcoming projects which are
chosen by our Cave's DAO.

These promising NFTs will be given
away to those who holds Ali Baba
Pass. Renewedly, the ones who are
able to open magical doors are
prioritised.

The Great Treasure

We have reached the second entrance's end and laid our eyes on this announcement scroll:

HEAR YE! HEAR YE!

After the first month of Ali Baba Pass launch, the first giveaway will take place.

A world of whitelists will be distributed and numerous giveaways will be in progress.

Do not miss the Great Treasure event, the biggest event hosted for the blockchain community!

And remember that this first giveaway is precursor of the many that will come after it:

The weekly giveaways called

THE MAGIC LAMP.

The Magic Lamp

The name arouses our interest so we try to gather information.
With the clues we gather, we come to believe that this will be an enchanted experience.

Exclusive to Ali Baba Pass owners, The Magic Lamp is a giveaway occasion that will take place weekly. Owners will get the chance to caress the Magic Lamp. The Magic Lamp, after being caressed, can grant a gift to the one who caressed it or it can turn out empty. Albeit, since it can be caressed weekly, owners always have a chance to be rewarded!

Plus, the more Ali Baba a holder owns,
the more The Magical Lamp they get to caress!

Ali Baba DAO

As we leave the giveaways behind us, we see the name 'DAO' carved above an entrance. We get to step in this entrance thanks to Ali Baba Pass we own.

We read the description:

DAO is a nonhierarchical formation that can vest the holders with a say in both the management and decision-making of a project.

As we wish our holders to get to experience every aspect of blockchain technology, DAO is implemented to our Cave. Hereupon, Ali Baba Pass owners are granted the right to vote in DAO polls. What is more, every Pass they own enables another voting right to them!

NFT Statistics on Solana Network

While we are moving forward, we find out the cave has a passage that provides detailed information on NFT statistics of Solana Network. We enter the passage. What is figured out that everyone can obtain access to this passage but it can give limited data up to a point.

Only Ali Baba Pass can get us forward from that point and grant access to this premium door behind which we can find vast quantities of information.

We continue to explore.

What do these statistics include?

First of the mentioned statistics is 'Trending Projects'. The Cave help the users track recent trending projects on Solana Network.

Since a general access is given to them, everyone is able to see the trending projects of the last one hour. However they cannot follow us to the deeps of this passage by the reason of not possessing the magic password. We leave them behind and keep on walking. Ali Baba Pass owners are granted to premium access. So with having the premium access, we get to reach the data of trending projects of the last 6 hours, last 12 hours, last week and more.

What do these *statistics* include?

We discern a 'Discover' section exist in the cave with the reason of being adventurous is one of the innate qualifications. This section contains popular and famous NFT projects to help passers by be in touch with current state of the NFT world. Their weekly volume and number of sales can be observed in this section. Yet again, we observe that others with the general pass only have access to see these data of a limited time while Ali Baba Pass holders, because they are granted premium access, get to see beyond.

Let us remind you:
Do not worry, this is not a dangerous discovery like Kasim's!

Since its builders are innovative and want to support and introduce new treasures to this glamoured world, the Cave displays a passage of new NFT projects for the visitors to get information about them. When their minting process begins, new projects can be observable here. As we know the magic words, we are able to see the latest projects of the last one hour, three hours, twelve hours and twenty four hours. The activities of these projects also can be trackable for us.

While we check the information of the projects, we notice that other visitors without the pass can only reach the data and activities of the last one hour's projects.

While leaving this section behind us, we peruse this note craved to a wall:

PS: After twenty four hours of being live, the project will be excluded from the New Projects List.

Now, we get into 'Upcoming Projects' section that is built in the cave.

The introduction note on the entrance reads:

In order to be listed on this section, projects have to go through the process to fill an elaborate form to apply. Provided they are accepted for listing, detailed information of these projects will be able to be found on the platform. These information contains their date of release, value and supply. Their website and socials such as Twitter accounts and Discord channels will be shared with their statistics if acquired from the teams. It is noticed that this section is reachable for every visitor since we could enter without using the pass and spot the others could arrive here, too.

We figure out the prime focus of the Cave is on Solana Network.
However, we came across to this sign that says:

We recognize that blockchain world is a vast terrene. Based on this, starting with ETH Network, we plan to implement other networks' statistics such as Avax and BSC on our platform in the upcoming phases.

We cannot wait to see what other possibilites await us thanks to owning Ali Baba Pass.

Exciting!

Token & Staking

There is a sign of 'Under Construction' on an entrance but we decide to break in anyway.

This is a shiny room with lots of coins that bewitches us.

We search the room to get some clues and then find sketches.

Here is what we have gathered so far:

With the total supply of 2.000.000, a token will be launched in the midst of the project which is approximately between 4-6 months into it.

The launch will take place on Solana Network.

10% of the token supply will be distributed among the Ali Baba Pass owners who stake their NFTs, so naturally their NFTs should not be listed.

Token & Staking

We turn the page and keep reading:

The remaining tokens will be used to procure passive income for holders who use staking option. During the first year, daily 1 token will be airdropped to those who stake their Pass and from the beginning of the second year, this number will be lowered to daily 0,5 token.

Its first utility is to be used in NFT launches on the platform. Token's places of use and other details related to it will be updated.

On the Aspect of Floor Price

While taking a look at the pages of the sketches, we find out the builder's of the cave has come up with a solution to keep the floor price high.

Their notes read as:

For every project, keeping the floor price high could be an issue since it is mostly determined by the holders. We find a formula to be able to have control. If an Ali Baba Pass owner does not list their NFT in the first phase or if they list it above 10 SOL, they will be entitled to The Magic Lamp, Whitelist privilege and DAO polls to be motivated. Being the benefiter, holders also will be able to contribute to keep the floor high.

Whilst we are nearing the end of our journey in the cave,
the sign welcomes us which says:

A Production
of
10 SEC LABS

The background is a dark, textured environment, possibly a cave or a magical realm. On the left, a large, glowing yellow structure with a jagged, crystalline top is illuminated from within. It sits on a dark, rectangular platform. In the foreground, there are several dark, angular rock formations. On the right, a character with a purple cape and dark armor stands on a small, glowing purple platform. The character is holding a glowing purple staff or wand, and a bright purple spark is visible at the tip. The overall lighting is dim, with the primary light sources being the glowing yellow structure and the purple character's platform and staff.

If you are not like one of the forty thieves and more like the smart Morgiana, you should join our adventure and magical world in haste.

The background is a dark, textured parchment map. In the center, a bright yellow starburst with a horizontal lens flare is surrounded by several overlapping circles and smaller stars. To the left, a circular object, possibly a compass or a small globe, is partially visible. In the bottom right corner, a key is depicted. The overall aesthetic is historical and exploratory.

If you have any questions or proposals, feel free to reach us!
